At Creature Comforts Boarding Kennels, your pets will be given plenty of love, individual attention, and exercise (dogs get a country run twice a day and cats have lots of room to play).

For the walks, dogs are grouped according to compatibility, erring on the side of caution at all times. If specifically requested, your dog can be walked on a leash, though, the vast majority love running free.

Dogs will be comfortable in their spacious kennels, each of which has a large outside run leading into an indoor area with beds, and have 24/7 access to both. Water bowls/buckets are topped up twice a day and kept inside to keep cool. Your pets will have plenty of personal attention.

A vet is on call 24/7.

You provide the dog's food and any feeding instructions (quantity, restrictions, etc...). If food is not provided or runs out, we can accommodate by feeding your dog a quality brand at 25 pesos/day.

Any routine medications required will be administered at no extra cost (please clearly label the meds with your pet's name and amount/frequency. A zip-lock bag works well for this).

**Boarding rates for dogs: 250 pesos / day / dog. ( 3 dogs = 650 pesos / each dog after 3 is 150 pesos )**

**We offer a pick-up and drop-off service for 250 pesos per transport.**

**We also have a dog wash/towel dry service for 200 pesos per dog.**

**Boarding rates for cats: 150 pesos / day/ cat. (kibble and wet food included)**

We will also request your dogs' vaccination records before boarding to ensure that vaccines have been administered and are current. These include the following: Rabies, Multi (which provides for distemper, parvo, hepatitis, leptospirosis, and Bordetella).
